## CONTENTS

<b>1</b>	<b>TABLE OF CONTENTS</b>	
<b>2</b>	<b>ACKNOWLEDGMENTS</b>	
	Acknowledgments . . . . .	1 - 2
<b>3</b>	<b>OVERVIEW</b>	
	Sweet Success Improves Pregnancy Outcomes . . . . .	2
	Purpose of <i>Guidelines for Care</i> . . . . .	2
	Figure 1. The Cycle of Diabetes . . . . .	3
	Introduction to CDAPP . . . . .	3
	The Triage Model of Care . . . . .	3
	Cost-benefit Analysis . . . . .	4
	Program Administration . . . . .	4
	State Role . . . . .	4
	Regional Role . . . . .	4
	Clinical Affiliate Role . . . . .	5
	Description of Affiliate Types . . . . .	5
	Table 1. CDAPP Clinical Affiliate Levels . . . . .	6
	References . . . . .	7
<b>4</b>	<b>ROLE OF THE TEAM</b>	
	Multidisciplinary Team Approach . . . . .	2
	Team Roles . . . . .	3
	Table 1. Role of Team Members . . . . .	3 - 4
	References . . . . .	5
<b>5</b>	<b>MEDICAL MANAGEMENT</b>	
	Introduction . . . . .	4
	Preconception Counseling . . . . .	5
	Medical Intervention and Health Education. . . . .	5
	Treatment of Obesity . . . . .	6
	Normoglycemia and Weight Management . . . . .	6
	Contraception . . . . .	6
	Planning Pregnancies . . . . .	6
	Contraception Options for a Woman with Preexisting Diabetes . . . . .	7
	Table 1. Barrier Methods of Contraception . . . . .	7
	Table 2. Other Methods of Contraception . . . . .	8 - 9
	Table 3. Oral Contraceptives and Dosages for Emergency Contraception . . . . .	10
	Prenatal Care and Medical Testing for a Woman with Preexisting Diabetes . . . . .	10
	Initial Maternal Medical Assessments . . . . .	10
	Table 4. Recommended Initial Tests Preconception for a Woman with Preexisting Diabetes . . . . .	12 - 13
	Blood Glucose Management . . . . .	13
	Blood Glucose Goals . . . . .	13

Table 5A. Preconception: Recommended Plasma and Whole Blood Glucose Values . . . . .	14
Table 5B. Pregnancy (Complicated by Diabetes): Recommend Plasma and Whole Blood Glucose Values . . . . .	14
Hypoglycemia . . . . .	14
Hypoglycemia - Type 1 Patients . . . . .	14
Table 6. Hypoglycemia Etiology, Signs and Symptoms . . . . .	15
Use of Glucagon . . . . .	15
Hypoglycemia - Type 2 Patients . . . . .	15
Preconception Insulin Management . . . . .	16
Insulin Therapy Issues - Preconception . . . . .	16
Table 7. Insulin Action . . . . .	17
Table 8. Examples of Various Insulin Regimens . . . . .	17
Insulin Initiation in the Preconception Period . . . . .	18
Considerations for Insulin Therapy Initiation . . . . .	18
Self-Monitoring of Blood Glucose (SMBG) . . . . .	18
Quality Control Issues of SMBG . . . . .	18
Factors That Impact Blood Glucose Levels . . . . .	19
Testing Regimen and Insulin Adjustment . . . . .	19
Table 9. Blood Glucose Testing Times and Rationale for Preconception or Pregnant Woman on Insulin . . . . .	20
Ketone Testing . . . . .	21
Urine Ketone Testing in the Preconception Period . . . . .	21
Blood Ketone Testing . . . . .	21
Post Conception Care . . . . .	21
Maternal Evaluation After Conception . . . . .	21
Breastfeeding . . . . .	21
Table 10. Recommended Maternal Medical Tests for a Pregnant Woman with Preexisting Diabetes (to be offered at first prenatal visit) . . . . .	22
Gestational Diabetes Mellitus (GDM) . . . . .	23
Screening for GDM . . . . .	23
Risk Factors . . . . .	23
Early Screening Indicators for GDM . . . . .	23
Gestational Diabetes Screening and Diagnosis Flow Sheet . . . . .	24
Glucose Testing Instructions . . . . .	25
Screening Test for GDM . . . . .	25
Diagnostic (confirmatory) Test for GDM . . . . .	25
Postpartum Diagnostic (confirmatory) and Annual Screening for Type 2 Diabetes Mellitus . . . . .	25
Diagnosing Diabetes: Laboratory Tests . . . . .	26
Insulin Therapy in GDM . . . . .	26
Factors to Consider for Insulin Initiation With GDM . . . . .	26
Types of Insulin . . . . .	27
Insulin Therapy Initiation . . . . .	27
Insulin Therapy in Pregnancy Complicated by Diabetes . . . . .	27
Table 11. Total Daily Insulin Requirements for Pregnancy . . . . .	27
Sick Day Management . . . . .	28
Instructions for Managing Diabetes With Illness for a Pregnant Woman on Insulin Therapy . . . . .	28
Prenatal Blood Glucose Monitoring . . . . .	28
Factors that Impact Blood Glucose Levels in the Prenatal Period . . . . .	28

Hypoglycemia - GDM . . . . .	29
Testing Regimen for Diet and Exercise Managed GDM . . . . .	29
Prenatal Weight Management . . . . .	29
Balancing Food Intake, Exercise and Medication . . . . .	29
Urine Ketone Testing For GDM . . . . .	30
Urine Ketone Testing as a Tool for GDM Management . . . . .	30
Prenatal Ketone Testing in Preexisting Diabetes . . . . .	30
Blood Ketone Testing . . . . .	30
Fetal Evaluation . . . . .	30
Recommended Fetal Testing . . . . .	30
Table 12. Recommended Antenatal Fetal Evaluations for a Woman with Preexisting Diabetes . . . . .	31 - 32
Table 13. Recommended Antenatal Fetal Evaluations for a Woman with Gestational Diabetes . . . . .	33
Intrapartum Management of Women With Diabetes . . . . .	34
Labor and Delivery Preparation . . . . .	34
Timing of Delivery . . . . .	34
Intrapartum Management of Preexisting Diabetes . . . . .	34
Intrapartum Management of GDM Requiring Insulin . . . . .	35
Intrapartum Management of GDM Controlled by Diet/Exercise . . . . .	35
Postpartum Management of Women with Preexisting Diabetes . . . . .	35
Postpartum Follow-up for Preexisting Diabetes . . . . .	35
Postpartum Management of Women with GDM . . . . .	37
Postpartum Follow-up for GDM . . . . .	37
Table 14. Identification of a Woman with Type 2 Diabetes History of GDM . . . . .	38
Contraception Options for GDM . . . . .	39
References . . . . .	40

<b>7 TRIAGE MODEL OF CARE</b>	
Introduction	2
Description of Triage Model of Care Components	2
Levels of Care	2
Table 1. Sweet Success Diagnostic Criteria for the Triage Process	3
Overview of Levels and Interventions by Discipline	3
Health Education Intervention	4
Nutrition Intervention	4
Psychosocial Interventions	4
Psychosocial Risks	5
Table 2. Definition of Psychosocial Risks	5
Table 3. CDAPP Interventions for Impaired Glucose Tolerance and Gestational Diabetes	6 - 8
Table 4. CDAPP Overview of Interventions for Preexisting Diabetes	9
Conclusions	10
References	11
<b>8 EXERCISE</b>	
Introduction	2
Benefits/Risks of Exercise in Diabetes and Pregnancy	2
Table 1. Maternal/Fetal Benefits and Potential Risks of Exercise	2
Preexercise Evaluation	3
Maternal Response to Exercise	3
Cardiovascular Changes	3
Metabolic Changes	3
Musculoskeletal Changes	4
Blood Flow Changes	4
Heat Production	5
Fetal Response to Maternal Exercise	5
Fetal Heart Rate	5
Fetal Temperature	5
Developing an Individualized Exercise Plan	5
Contraindications for Exercise During Pregnancy	6
Preconception Exercise for Type 1 and Type 2 Women	6
Table 2. General Preconception Exercise Guidelines for a Woman with Preexisting Diabetes	7
Prenatal Exercise for a Woman with Diabetes	7
Table 3. Prenatal Exercise Guidelines for a Woman	

Preexisting Diabetes .....	8
Exercise and Insulin Issues During Pregnancy .....	8
When to Exercise/Avoid Exercise .....	9
Safety Precautions .....	9
Balancing Snacks and Insulin .....	9
Table 4. Blood Glucose Value and Carbohydrate Needs for Physical Activity During Pregnancy for a Woman with Preexisting Diabetes .....	10
Postpartum Exercise Issues .....	10
References .....	11
Appendix 1. Suggested Strengthening Exercises for a Pregnant Woman with Diabetes .....	14
Appendix 2. Rating of Perceived Exertion .....	17
<b>9 NUTRITION</b>	
Introduction .....	2
Figure 1. The Four-Step Model for Medical Nutrition Therapy for Diabetes .....	2
Medical Nutrition Therapy Individualized .....	3
Nutrition Assessment .....	3
Table 1. Components of a Nutrition Assessment .....	4
Goals of Medical Nutrition Therapy .....	5
Medical Nutrition Therapy Plan .....	5
Preconception Weight Goals .....	5
Table 2. Preconception Weight for Height Category .....	6
Table 3. Calculating Body Mass Index .....	6
Table 4. Weight Gain Ranges Based on Weight Categories and Body Mass Index .....	7
Determining Energy Needs .....	7
Preconception Energy Needs .....	7
Table 5. Calculating Preconception Calorie Needs .....	8
Prenatal Energy Needs .....	8
Table 6. Energy Needs for Pregnancy Based on Gestational Age .....	8
Pregnant Weight Goals .....	9
Determining Appropriate Weight Gain .....	9
Table 7. Recommended Weight Gain During Pregnancy .....	9
Excess Weight Gain .....	9
Inadequate Weight Gain .....	10
Nutrition Needs for Preconception and Pregnancy Care .....	11
Table 8. Dietary Guidelines for Preconception and Pregnancy Care .....	11
Meal Plan Recommendations .....	12
Carbohydrate Sources to be Limited .....	13
Recommended Carbohydrate Sources .....	13
Breakfast .....	14
Snacks .....	14
Nutrition Education Issues .....	14
Education Materials .....	15
Importance of Normoglycemia .....	15
Table 9. Preconception: Recommended Plasma and Whole Blood Glucose Values .....	16
Table 10. Pregnancy (Complicated by Diabetes):	

Recommended Plasma and Whole Blood Glucose Values . . . . .	16
Summary Points For Maintaining Normoglycemia . . . . .	16
Evaluation of Medical Nutrition Therapy Goals . . . . .	17
Table 11. Outcome Goals for Diabetes and Pregnancy . . . . .	17
Special Nutrition Issues In Diabetes and Pregnancy . . . . .	18
Urine Ketone Testing in Gestational Diabetes . . . . .	18
Sick Day Management . . . . .	18
Postpartum Nutrition Issues . . . . .	19
After GDM . . . . .	19
Preexisting Diabetes . . . . .	20
Lactation . . . . .	20

## 10 PSYCHOSOCIAL

The Importance of Psychosocial Services . . . . .	3
Psychosocial Risk Factors . . . . .	3
General Mental Health Risk Factors . . . . .	3
Medical Risk Factors . . . . .	4
Pregnancy/Childbirth/Parenting Risk Factors . . . . .	4
Support Network Risk Factors . . . . .	4
Lifestyle Choice Risk Factors . . . . .	4
Cultural Risk Factors . . . . .	4
Overview of Behavioral Medicine Service . . . . .	4
Assessment . . . . .	5
Care Plan . . . . .	5
Intervention . . . . .	5
Confidentiality . . . . .	5
Documentation . . . . .	6
Psychosocial Assessment of a Woman with Diabetes During Pregnancy . . . . .	6
General Assessment: Core Psychosocial Variables . . . . .	6
Adjustment to Diabetes . . . . .	6
Previous Perinatal Loss . . . . .	6
Social Support System . . . . .	6
Personal Adjustment to Pregnancy . . . . .	7
General Emotional Status and History . . . . .	7
Current Stressors . . . . .	7
Housing and Household . . . . .	7
Education and Employment . . . . .	7
Financial and Material Resources . . . . .	7
Cultural and Ethnic Considerations . . . . .	8
Specialized Assessment Areas . . . . .	8
Preexisting Diabetes: Preconception and Pregnancy . . . . .	8
History of Diabetes . . . . .	9
Reaction to Pregnancy . . . . .	9
Gestational Diabetes Mellitus . . . . .	9
Practitioner's Assessment Summary . . . . .	10
General Mental Health . . . . .	10
Support Network . . . . .	10
Lifestyle Choices . . . . .	10
Access to Resources . . . . .	10
Self-Management Skills . . . . .	10

Diabetes and Pregnancy Awareness	10
Cultural Background	10
Postpartum Assessment	10
Dependency Issues	11
Adjustment to Parenthood	11
Postpartum Depression	11
Adherence Issues in Diabetes and Pregnancy	11
Common Difficulties in Adjustment to Diabetes	12
Type 1 Diabetes	12
Type 2 Diabetes	13
Gestational Diabetes	13
Immediate and Short Term Patient Response to Diagnosis	13
Interim Patient Responses	13
Near Term Patient Responses	13
Source of Stress Associated with Gestational Diabetes	13
Diabetes Management Challenges	13
Diabetes Care Events	14
Problems with Medical Nutrition Management	14
Blood Glucose Testing	14
Record Keeping	14
Exercise	14
Appointments	14
Education	14
Fears and Anxieties	14
Individualized Psychosocial Care Plan	15
Psychosocial Interventions	15
Clarification and Problem Solving	15
Education	16
Counseling and Support	16
Stress Reduction	17
Confidentiality and Documentation	17
References	18
Appendix 1. Stress Check Questionnaire	20
<b>11 BREASTFEEDING</b>	
Introduction	2
Benefits of Breastfeeding	2
Table 1. Benefits of Breastfeeding	3
General Breastfeeding Education Guidelines	3
Breastfeeding Hospital Policy	4
Supportive Policies for Breastfeeding	4
General Breastfeeding Considerations	5
Guidelines for a Breastfeeding Woman with Diabetes	5
Type 1 Diabetes	5
Milk Production in Type 1 Diabetes	5
Maternal Hypoglycemia in Type 1 Diabetes	6
Insulin Needs During Lactation	7
Blood Glucose Goals During Lactation	7
Type 2 Diabetes	7
Oral Hypoglycemic Agents	7
Infant Obesity	9
Infant Diet and Early Exposure to Cow's Milk	10
Post Gestational Diabetes Considerations	10

Nutrition Needs During Lactation	10
Energy Needs	10
Table 2. Nutrition Recommendations for a Lactating Woman with Diabetes	11
Fluid Needs	11
Alcoholic Beverages	12
Artificial Sweeteners	12
Supplements	12
Snacks	12
Use of Herbs	12
Other Indications for Seeking Medical Care	13
Conclusion	13
References	14
Appendix 1. Medicinal Herbs Considered Inappropriate for Use During Pregnancy and Lactation	19
Appendix 2. Herb and Contraindicated Drug Table	20
<b>12 CULTURAL COMPETENCY</b>	
<b>LEARN</b> take these steps to increase your cultural competence	2
Culture, Pregnancy and Diabetes	2
Case Study	2
Comment	3
<b>LISTEN</b> to the woman's perspective	4
Health Educator	4
Registered Dietitian	4
Behavioral Medicine Specialist	4
What to do for Listen	5
Express <b>EMPATHY</b>	5
Health Educator	5
Dietitian	5
Behavioral Medicine Specialist	5
What to do for Empathy	6
<b>ACKNOWLEDGE</b> the wisdom of family and folk traditions	6
Health Educator	6
Dietitian	6
Behavioral Medicine Specialist	6
What to do for Acknowledge	7
<b>RECOMMEND</b> a treatment plan	7
Health Educator	7
Dietitian	7
Behavioral Medicine Specialist	8
What to do for Recommend	8
<b>NEGOTIATE</b> a treatment plan with which you all can agree	8
Health Educator	8
Dietitian	8
Behavioral Medicine Specialist	8
What to do for Negotiate	9
Summary	9
